

# BEAR POWER™ DRYER

Model # BPD-1

## Owners Manual

### 1. Before grooming

Be careful not to blow air into the pet's face, ears and nose. Use the cone nozzle to blow out dirt and undercoat and separate matted hair.

### 2. After bathing

Towel dry the pet to remove excess water. Use the cone nozzle to blow off moisture working out from the skin. Switch to one of other attachments to dry the more sensitive areas.

The **BPD-1** produces just enough heat to speed up the drying process with no danger to the pet. You can also use the **BPD-1** to fluff up the pet's coat and give it a quality finished look.

### DO'S

Clean the **BPD-1** filter every two months by unsnapping the black cover at the back of the unit and washing the foam filter in a soapy water solution. Rinse completely and after thoroughly dry, replace it into the dryer. Use the same washing and drying method to clean the attachments.

Always make sure the **BPD-1** is unplugged before any cleaning / maintenance.

### DON'TS

**DO NOT** immerse the **BPD-1** in water. Exposure to water will result in electric shock.

**DO NOT** alter or remove the grounding plug. Do not use the **BPD-1** if it cannot be properly grounded, and if electrical cord is frayed or shows any sign of wear.

**DO NOT** place the **BPD-1** in standing or running water. Exposure to water will result in electric shock.

**DO NOT** let the air intakes get clogged. Overheating could occur and cause fire or electrical hazard. Never use without filter in place.

**DO NOT** leave the **BPD-1** unattended when turned on.

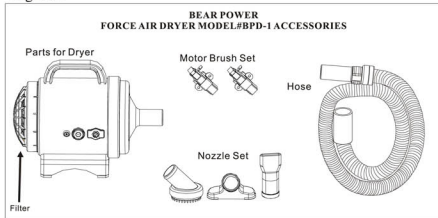

**DO NOT** run for long periods of time on low speed.

### FAILURE TO OBSERVE DON'TS MAY VOID THE WARRANTY \*

Regular Maintenance ( Failure to observe the following regular maintenance will void the warranty)

- Cleaning of the filter every 2 months (see figure 1) We recommend replacing the filter every 6 months.
- Never disassemble the **BPD-1** dryer.
- Replace the brushes every 4 to 6 months (see figure 2)
